

Rafter Mount Plant Platform

PLT.R

Applications & Advantages

- Safe, easy access to roof-mounted equipment for maintenance personnel.
- High strength for heavy duty and high load applications.
- Custom-engineered to suit your needs.
- High strength to weight ratio minimises dead loads and reduces costs through minimised sub-structure.
- Increased clearance under platform for ducts, pipework and maintenance access.

Material

High grade T6 Australian structural aluminium

Compliance

Complies with AS/NZS1170 series, AS1657 and AS/NZS1664.1. Earthquake rated to comply with AS/NZS1170.4

Warranty

25 years

Inspections & Maintenance

Regular inspections are recommended to ensure the integrity of the platform is upheld.

Loadings

Engineered to support live and dead loads required by the specific project in accordance with AS/NZS1170.1. Designed for wind loads according to AS/NZS1170.2 and seismic loads according to AS/NZS1170.4.

Weight

Skeletal and mesh platforms weigh up to 85% less than alternative structural steel systems.

Spans

Spans up to 18m or greater can be achieved.

Perimeter Options

Guardrails, screens or acoustic screens.
